Score: Magni scores every country in the world based on its adherence to the Sustainable Wealth Creation Principles. The research database has more than 17 years of history, and is based on 12 standards that contain 280 specific, individual factors on country-level governance. The research is updated monthly.

Rank: Magni ranks every country based on its score and uses this to construct its portfolios. A change in score or rank may change the allocation in a portfolio.
