

Magni Country Governance Index— All Country World ex US

BECAUSE COUNTRIES MATTER™

Magni Country Governance Index—All Country World ex US seeks to track the level of good governance in the countries Magni considers to be in the non-US investible universe. Research focuses on each country’s legal, regulatory, and economic infrastructure to assess the level of good governance. The research results in a score for each country which determines the country weights in the index.

WHY IS COUNTRY GOVERNANCE IMPORTANT?

1. **All countries are different**—All countries have different legal, regulatory, and economic infrastructures which affect the ability of companies to conduct business and be successful.
2. **Governance controls the rules and regulations**—Companies must abide by government laws and regulations, while corporate governance is strongly influenced by these requirements. Company valuations are impacted by country governance, including the believability of the current financial statements, the projection of future earnings, and the risks to such projections.
3. **Countries with good governance outperform**—The more honest and transparent a country is with its citizens, businesses, and investors, the more wealth is created in the country. Economic studies have shown that countries which have an open, honest, and transparent economy outperform those that do not.

THE MAGNI DIFFERENCE—LOOKING BELOW THE SURFACE FOR THE BIG PICTURE

Traditional investment analysis focuses on historical comparisons and projections using reported company data but ignores the impact of differences between countries.

Magni researches important information about how Countries Matter™

- Do financial statements accurately reflect a company’s position?
- Are shareholders protected and are there adequate controls?
- Can company leadership make decisions confidently...and without interference from a corrupt government?

LICENSING INFORMATION

Magni Global Asset Management LLC licenses its indexes to firms involved in the issuance of Exchange Traded Products (ETPs). If you are interested in licensing an index from Magni, contact us at info@magniglobal.com.

Provided by Magni Global Asset Management LLC. This is not investment advice or a recommendation to buy or sell securities. Investors may not invest directly in an index.

WHY MAGNI?

- 1. Long term research track record**—Magni's research database is based on Sustainable Wealth Creation principles and contains data on 280 Qualitative Sovereign Factors grouped into 12 Economic Standards and collected updated monthly over the past 16 years.
- 2. Repeatable process**—The research on the Qualitative Sovereign Factors is accumulated to determine a score for each Economic Standard and then combined into an overall Magni Country Score. The higher the country score, the greater the country weighting in the index.
- 3. Experienced Manager**—Magni has used this strategy to run Magni Model Portfolios since 2003 and to manage money for clients in Magni Global Portfolios since 2012.

INDEX BACK-TEST RESULTS

Magni's index back-tested returns reflect results from 12/31/2006 to 12/31/2016 using country-level ETF index funds with at least \$50 million of assets and a tracking error of no more than 125 basis points as of 12/31/16. End of month prices were used. Weightings were rebalanced on a bi-annual basis based on Magni's Country Scores and the Country Selection Technique. Results do not include transaction costs or imputed commissions. The Magni Country Governance Index-ACWI ex US (MAGACWX) includes 36 countries considered to be in the Developed Markets outside the US and Canada.
